Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims Claims	<u>3 - 4, 13</u> <u>1 - 2, 5 - 12, 14 - 15</u>	YES NO
Inventive step (IS)	Claims Claims	1 - 15	YES NO
Industrial applicability (IA)	Claims Claims	1 - 15	YES NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: WO 0135613 A1

D2: US 20020175665 A1

D3: WO 0002361 A1

D4: US 6243596 B1

D5: US 20020013161 A1

D6: DE 10019651 A1

The invention relates to an exchangeable power-supplying unit arranged to supply electric power to a device, a device comprising an exchangeable power-supplying unit, a telecommunication system comprising a device and a method for providing a device with one or several additional functionalities.

The invention is intended to provide an additional function to the device.

Document D1 (page 6, line 24 - page 10, line 33, figures 1 - 2, abstract) discloses an exchangeable power-supplying unit (100B, 100C) arranged to supply electric power to a device (mobile telephone 100A). The power-supplying unit (100B, 100C) has a mass-storage (149) and a processing unit (129, 129', 147) and communicates (interface 127) information with the device (100A) in order to provide the device (100A) with additional functionalities (GPS 131, Bluetooth 133).

PCT/SE2003/002018

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The construction and use of the device are not clear from independent claims 1, 8, 11 and 12. Therefore, these independent claims do not meet the requirement following from Article 6 PCT taken in combination with Rule 6.3(b) PCT that any independent claim must contain all the technical features essential to the definition of the invention.

PCT/SE2003/002018

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box V

Document D2 (page 1, column 1, line 1 - page 11, column 2, line 18, figures 1 - 5, abstract) discloses an exchangeable power-supplying unit (10) arranged to supply electric power to a device (PDA or mobile telephone 90). The power-supplying unit (10) has a processing unit (22) and communicates information with the device (90) in order to provide the device (90) with an additional functionality (media decoder).

Document D3 (page 2, line 11 - page 9, line 36, figures 1 - 3, abstract) discloses an exchangeable power-supplying unit (60, see page 7, line 33 - page 8, line 2) arranged to supply electric power to a device (mobile terminal 10). The power-supplying unit (10) has a memory (81, 82), a data bus (85') and a processing unit (70) and communicates information with the device (10) in order to provide the device (10) with one or several additional functionalities (applications).

Document D4 (column 15, line 10 - column 19, line 42, figures 9 - 12, abstract) discloses an exchangeable power-supplying unit (100) arranged to supply electric power to a device (mobile phone 310). The power-supplying unit (100) has a memory (403, 404) and a processing unit (CPU 401), and communicates information with the device (310) in order to provide the device (310) with an additional functionality (acting as a portable computer with Internet browsing, see column 15, lines 10 - 13).

Document D5 (page 1, column 1, line 1 - page 5, column 1, line 13, figures 1 - 5, abstract) discloses an exchangeable power-supplying unit (10) arranged to supply electric power to a device (mobile telephone 48). The power-supplying unit (10) has a processing unit (130) and communicates information with the device (48) in order to provide the device (48) with an additional functionality (camera).

Document D6 (column 1, line 1 - column 3, line 27, figure 1, abstract) discloses an exchangeable power-supplying unit (9) arranged to supply electric power to a device (mobile telephone, PDA, laptop 1). The power-supplying unit (9) communicates with the device (1) in order to provide the device (1) with additional functionalities (GPS).

PCT/SE2003/002018

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box $\,V\,$

The invention claimed in claims 1-2, 5-12 and 14-15 is at least essentially known from document D1. Thus, the invention claimed in claims 1-2, 5-12 and 14-15 is not new and consequently lacks novelty and inventive step. Claims 1-2, 5-12 and 14-15 fulfil the requirement of industrial applicability.

Documents D2 - D6 show a similar art.

In claims 3-4 and 13 slight constructional variations are suggested that are obvious to a person skilled in the art. Thus, the invention claimed in claims 3-4 and 13 is novel but lacks an inventive step. Claims 3-4 and 13 fulfil the requirement of industrial applicability.

To sum up, the invention claimed in claims 1-2, 5-12 and 14-15 lacks novelty and inventive step, and the invention claimed in claims 3-4 and 13 is novel but lacks an inventive step. All the claims fulfil the requirement of industrial applicability.
